the little bee sting helper

This little bee sting helper card can come in very handy if you have been stung by a buzzing critter! This thick paper card is wallet sized so you can take it with you on the go. All ON-SITE clients receive this handy helper during their training sessions, however if you want a bee sting helper now, simply follow the instructions below but use a credit card instead.

The Little
BEE STING HELPER

USE THIS CARD WHEN STUNG BY A WASP OR BEE.

DIRECTIONS:
Scrape the surface of the skin with this card towards the injection site until stinger is removed.
Do not use tweezers - doing so will inject more poison.

TIP: Never use tweezers to remove a stinger. Tweezers are great for splinters but bad for stingers!

NOTE: A quick reference guide is not a replacement for first aid and CPR training – get trained today and save a life.
